### Profile

I am a Java Backend Developer with 2 years of hands-on experience in building secure, scalable, and high-performance APIs using Spring Boot and modern backend tools. I have a solid understanding of Java OOP, Spring Security, RESTful architecture, Zoho Creator, and relational databases like MySQL and PostgreSQL. I also work comfortably with frontend tools like React and Vue at an intermediate level. Beyond technical skills, I value strong communication, collaboration, and a positive work ethic. I'm known for being a reliable team player, quick learner, and someone who thrives in dynamic environments—committed to writing clean code, solving problems efficiently, and contributing to a healthy and productive workplace culture.

### Key Skills

Java  
Spring Boot  
React JS  
JUnit 5  
Git & Github  
Docker  
AWS and Azure  
Spring Security  
MySQL/PostgreSQL

### Experience

*Jan 201425—Present*

**Software Developer • Tedge DNA • Kajiando, Kenya**

Experienced Software Developer specializing in Zoho Creator and Deluge Scripting, focused on building custom business applications, automating workflows, and integrating with Zoho CRM and third-party APIs. Skilled in translating business needs into scalable, low-code solutions with strong emphasis on performance, usability, and collaboration.
